## Introduction

National Centre for Information Technology (NCIT) wishes to hire a competent firm or individual(s) to design the Maldives E-Government Portal for the citizens, businesses and the Government.

## Background

The Maldives E-government Portal is to be developed under the Application Turnkey Component of the Information Technology Development Project. The Maldives E-Government Portal has two sections. One for the services provided to citizens and the other for the services provided to businesses. The Maldives Government Portal can be accessed through the internet and each user will be issued a user name and a user password.

## Objectives

The Objective of this work is to:

- To provide assistance to NCIT in the design of the Maldives e-Government Portal for a period of one month.

## Scope

In order to achieve the objective of this Project, the Consultant will

- Assist NCIT in designing the graphical look and feel of the Portal
- Create graphical components necessary for the design
- Supply graphics, pictures, etc required to implement the graphical design.

## Deliverables

- The design and graphics of the Maldives e-Government Portal
