NATIONAL CENTRE FOR INFORMATION TECHNOLOGY

Ref no: (IUL)164/1/2015/132

Date: 31 December 2015

TOR - SOFTWARE DEVELOPER

BACKGROUND

National Center for Information Technology (NCIT) is an institute established on 25th of March 2003 as the main agency for the development, promotion and propagation of Information Communication Technology (ICT) in Maldives. One of the institutes' mandates is to establish, maintain and develop the National Computer Network of Maldives and provide Enterprise grade services such as SaaS, PaaS, IaaS. The Infrastructure Division is responsible for layout, maintenance and management of the National Computing Network (NCN) and providing efficient services to a client base of above 300.

MAIN DUTIES AND RESPONSIBILITIES

The position is within the IT Research & Development Division of NCIT, under the supervision of the IT Executive for E-Government Development. His/her specific duties will include, but will not be limited to:

1. Develop systems to enable citizens and businesses to apply and pay for Government Services online. The system should enable each agency to track, retrieve and process submissions related to their services. It should also allow agencies to update the status of the submissions and for the applicant to check the status of their submissions online.
2. Ability to study and understand complex software application systems
3. Work with end users and internal staff for timely resolution of application issues and develop new software applications/components.
4. Design and manage all phases of testing for assigned projects.
5. Write, revise and maintain software program documentation, operations documentation, and user guides in accordance with standards.

MANDATORY REQUIREMENT

- Should have strong knowledge and skills in PHP or .NET Technologies
- Understanding in web technologies including JavaScript, HTML5, CSS3 and jQuery
- Should have knowledge of database management systems, either MSSQL Server and MySQL
- Should be able to design, code and develop production level applications independently
- Degree in Software Engineering/IT

ADDED ADVANTAGE

- Strong programming background with knowledge in modular based programming and use of emerging trends (e.g. use of Ajax technologies)
- Good graphics skills and knowledge in UI design to improve usability
- Knowledge in full software development cycle including project formulating, version control and maintenance after deployment
- Project Management Skills – Good planning, scheduling, and analytic skills
- Good writing skills in Dhivehi and English
- Experience of MVC based application development

PERSONAL SKILLS & COMPETENCIES

- Strong commitment and willing to work outside normal working hours when required
- Strong interpersonal skills
- Ability to assess and communicate issues clearly
- Strong problem-solving skills.
- Attention to detail.

DURATION

- 12 months (Renewable based on performance)

REMUNERATION

MRF 12,000/- (All Inclusive)

CONTENTS OF JOB APPLICATION

The job applications should comprise the following documentation and late submission of any of the documents will not be accepted:

- Letter requesting for the job,
- Copy of Identification Card,
- Copies of academic certificates (Accredited)
- CV including references from previous employment
- Copies of reference produced by previous employers
