Date: 25th October 2017

SOFTWARE DEVELOPER

INTRODUCTION

The National Centre for Information Technology (NCIT) wishes to hire One (01) energetic, self-motivated, organized and enthusiastic Programmer for e-Service Development Project

OBJECTIVES

The objective of the programmers is to work as team under NCIT's guidance to provide programming service for the Government eService Development Project.

DURATION

1 year (Renewable based on performance)

KEY TASKS AND RESPONSIBILITIES

- Develop systems to enable citizens and businesses to apply and pay for Government Services online. The system should enable each agency to track, retrieve and process submissions related to their services. It should also allow agencies to update the status of the submissions and for the applicant to check the status of their submissions online.
- Study and understand complex software application systems
- Development of software application systems
- Work with end users and internal staff for timely resolution of application issues and develop new software applications/components.
- Write, revise and maintain software program documentation, operations documentation, and user guides in accordance with standards.
- Design and develop systems using TDD approach to development.

MANDATORY REQUIREMENT

- Degree in Software Engineering/IT/Computer Science and above, or Masters and above in any field
- Experience in Software Development with minimum 05 years
- Experience in .NET/PHP/JAVA technologies and other application development environments.
- Understanding web technologies including HTML5, CSS3 and jQuery

- Should have knowledge of Database systems, either MSSQL Server, MySQL and Postgres
- Should be able to design, code and develop production level applications independently
- Should be able to use modelling languages such as UML or SSADM for development and documentation.

ADDED ADVANTAGE

- Strong programming background with knowledge in modular based programming and use of emerging trends.
- Good graphics skills and knowledge in UI design to improve usability
- Mobile Application Development skills for both IOS and Android
- Knowledge in full software development cycle including project formulating, version control and maintenance after deployment
- Project Management Skills – Good planning, scheduling, and analytic skills
- Good writing skills in Dhivehi and English
- Preferences would be given to individuals with demonstrated skills in implementing unit testing and integration testing

PERSONAL SKILLS & COMPETENCIES

- Strong commitment and willing to work outside normal working hours when required
- Strong interpersonal skills.
- Ability to asses and communicate issues clearly.
- Strong problem-solving skills.
- Attention to detail.
- Strong time management skills.
- Ability to work under pressure and deliver project objectives.

REMUNERATION

Basic Salary: MRF 18,000/-

Performance Allowance: MRF 3,000/-

CONTENTS OF JOB APPLICATION

- The job applications should comprise the following documentation and late submission of any of the documents will not be accepted:
- Letter requesting for the job,
- Portfolio of Work Completed,
- Copy of Identification Card,
- Copies of academic certificates (Recognized)
- CV
- Copies of reference produced by previous employers
